

DevOps Lab Assessment

Name: bokhit mahamat tom

Prn:23070122249

1. Basic Containerization (Docker) & Jenkins Freestyle Project (3 Marks)

- **Task 3.1:** Create a Dockerfile for your Python Flask "Hello World" application. The Dockerfile should build a minimal image that runs the application on port 5000. Build the Docker image locally and verify it runs correctly. (1.5 Marks)

- **Task 3.2:** Set up a Jenkins Freestyle project. Configure it to pull your Git repository (from Task 1.1) and execute a build step that lists the contents of the workspace. Trigger a build and provide a screenshot of the successful build output. (1.5 Marks)
